

Notification of a Proposal to issue an Airworthiness Directive

PAD No.: 17-152

Issued: 24 October 2017

Note: This Proposed Airworthiness Directive (PAD) is issued by EASA, acting in accordance with Regulation (EC) 216/2008 on behalf of the European Union, its Member States and of the European third countries that participate in the activities of EASA under Article 66 of that Regulation.

In accordance with the EASA Continuing Airworthiness Procedures, the Executive Director is proposing the issuance of an EASA Airworthiness Directive (AD), applicable to the aeronautical product(s) identified below.

All interested persons may send their comments, referencing the PAD Number above, to the e-mail address specified in the 'Remarks' section, prior to the consultation date indicated..

Design Approval Holder's Name:

SAFRAN HELICOPTER ENGINES

Type/Model designation(s):

RTM 322 engines

Effective Date: [TBD - standard: 14 days after AD issue date]

TCDS Number(s): EASA.E.009

Foreign AD: Not applicable

Supersedure: None

ATA 05 – Time Limits / Maintenance Checks – Airworthiness Limitations Section – Amendment

Manufacturer(s):

SAFRAN Helicopter Engines, S.A. (formerly Turboméca, S.A.)

Applicability:

RTM322 01/9 engines, all serial numbers.

These engines are known to be installed on, but not limited to NH Industries NH90 (military) helicopters.

Reason:

The airworthiness limitations applicable to the RTM 322 engines series are currently specified in the applicable RTM 322 maintenance manual (MM) reference M3-A-EBM-00-D Section 05-10 Airworthiness Limitations Section, which are approved by EASA. These limitations have been identified as mandatory for continued airworthiness.

Failure to implement these limitations could result in an unsafe condition.

SAFRAN Helicopter Engines issued RTM 322 MM reference M3-A-EBM-00-D, dated 30 September 2017, which contains Section 05-10 Airworthiness Limitations Section (hereafter referred to as 'the

applicable ALS' in this AD). The applicable ALS includes a new repetitive task to improve the reliability of the automatically calculated consumed life of the engine life-limited parts.

For the reasons described above, this AD requires accomplishment of the actions specified in the applicable ALS.

Required Action(s) and Compliance Time(s):

Required as indicated, unless accomplished previously:

Maintenance Tasks and Replacement of Life Limited Parts:

(1) From the effective date of this AD, accomplish the following actions, as specified in the applicable ALS, as applicable to engine model and configuration:

(1.1) Replace each component before exceeding the applicable life limit, and

(1.2) Within the thresholds and intervals, accomplish all applicable maintenance tasks.

Aircraft Maintenance Programme (AMP) Revision:

(2) Within 12 months after the effective date of this AD, revise the approved AMP, on the basis of which the operator or owner of the helicopter (on which an affected engine is installed) ensures the continuing airworthiness of each operated engine, by incorporating limitations, tasks and associated thresholds and intervals defined in the applicable ALS.

Recording of AD Compliance:

(3) When the AMP of a helicopter has been revised as required by paragraph (2) of this AD, as applicable, that action ensures (see Note 1 of this AD) continued accomplishment of the tasks as required by paragraph (1) of this AD for the affected engine(s) installed on that helicopter. Consequently, after revising the AMP, as required by paragraph (2) of this AD, as applicable, it is not necessary that accomplishment of individual tasks is recorded for demonstration of AD compliance on a continued basis.

Note 1: For affected RTM322 engines installed on helicopters registered in Europe, complying with the approved AMP, as specified in paragraph (2) of this AD, is required by Commission Regulation (EU) [1321/2014](#), Part M.A.301, paragraph 3.

Ref. Publications:

SAFRAN Helicopter Engines RTM322-01/9 MM reference M3-A-EBM-00-D dated 30 September 2017.

The use of later approved revisions of this document is acceptable for compliance with the requirements of this AD.

Remarks:

1. This Proposed AD will be closed for consultation on 21 November 2017.
2. Enquiries regarding this PAD should be referred to the EASA Safety Information Section, Certification Directorate. E-mail: ADs@easa.europa.eu.

3. For any question concerning the technical content of the requirements in this PAD, please contact, please contact your nearest SAFRAN Helicopter Engines technical representative or connect to www.tools.safran-helicopter-engines.com.
