

## COMMENT RESPONSE DOCUMENT

EASA PAD No. 19-037

**[Published on 08 March 2019 and officially closed for comments on 05 April 2019]**

### **Commenter 1: China Eastern Airlines Technic – Zhong Lei – 04/04/2019**

#### **Comment # 1**

Airbus TechRequest 80603478 confirm that CES A320 aircrafts MSNs 6900 6950 6959 6971 7004 7049 7113 7168 7189 7253 7374 7431 7633 7654 7685 7712 7745 7747 7823 7832 7869 7883 7890 7893 7937 7987 8019 are embodied with MOD 159114. These MSNs are listed in Service Bulletin 92-1127R0 EFFECTIVITY in error.

So we suggest EASA revise the AD applicability as follow:

Airbus A319-112, A319-115, A319-132, A320-214, A320-216, A320-232 and A320-233 aeroplanes, all manufacturer serial numbers, as listed in Airbus Service Bulletin (SB) A320-92-1127, except those on which Airbus modification (mod) 158830 has been embodied in production, and those on which Airbus mod 159114 have been embodied in production.

#### **EASA response:**

***Comment partially agreed. Airbus confirmed that some aeroplanes having mod. 159114 embodied in production have been erroneously listed in the effectivity of SB A320-92-1127 R0. No airplanes having mod 158830 embodied in production are listed in the SB. Final AD has been amended accordingly.***
