Definitions:

For the purpose of this AD, the following definitions apply:

Affected part: Forward-facing galleys, having a Part Number (P/N) as listed in Appendix 1 of this AD.

The inspection SB: Airbus Service Bulletin (SB) A320-25-1BVS or Airbus SB A320-25-1BVT, as applicable.

The modification SB: Airbus SB A320-25-1CBN or A320-25-1CBP, as applicable.

Aeroplane date of manufacture: The date of transfer of title (ownership) of the aeroplane at the time of first delivery to an operator, which is referenced in Airbus documentation.

Groups: Group 1 aeroplanes are those that have an affected part installed. Group 2 aeroplanes are those that do not have an affected part installed.

Reason:

Occurrences have been reported of finding damage during inspection of certain galleys, including delamination of work deck as well as corroded and cracked retainer blocks.

This condition, if not detected and corrected, could affect the galley's capability to hold the trolley under emergency landing loads, which could lead to trolley detachment, possibly resulting in blocking of an escape path during an emergency exit.

To address this potential unsafe condition, Airbus issued the inspection SB, providing instructions to inspect the affected parts, and EASA issued AD 2021-0183 to require repetitive general visual inspections (GVI) of each affected part and, depending on findings, accomplishment of applicable corrective action(s).

After that AD was issued, it was determined that, following accomplishment of a certain repair, subsequent inspection of the repaired area could be deferred beyond the established inspection interval. Additionally, typographical errors were identified in Appendix 1 of that AD. Prompted by this development EASA issued EASA AD 2021-0183R1, accordingly.

Since EASA AD 2021-0183R1 was issued, Airbus and the galley manufacturer developed a modification to restore the design integrity of the affected galleys, and Airbus issued the modification SB, as defined in this AD, providing instructions for in service galley modification. It was also identified that some affected galley part numbers were missing in the Appendix 1 of EASA AD 2021-0183R1, while others could be removed from that list.

For the reasons described above, this AD retains the requirements of EASA AD 2021-0183R1, which is superseded, introduces the modification SB as an optional terminating action for repetitive inspections required by this AD, and revises the list of the affected galleys.

Required Action(s) and Compliance Time(s):

Required as indicated, unless accomplished previously:

Re-statement of EASA AD 2021-0183R1

Inspection(s):

- (1) For Group 1 aeroplanes: Within 36 months since first installation of an affected part on an aeroplane, or within 12 months after 18 August 2021 [the effective date of the EASA AD 2021-0183 at original issue], whichever occurs later, and, thereafter, at intervals not exceeding 6 months, accomplish a GVI of each affected part in accordance with the instructions of the inspection SB (see Note 1 of this AD).

Note 1: If the date of first installation of an affected part on an aeroplane is unknown, the aeroplane date of manufacture can be used instead.

Corrective Action(s):

- (2) If, during any GVI as required by paragraph (1) of this AD, discrepancies are detected on an affected part, before next flight, accomplish the applicable corrective action(s) in accordance with the instructions of the inspection SB.

Part(s) Installation:

- (3) For Group 1 and Group 2 aeroplanes: From 18 August 2021 [the effective date of the EASA AD 2021-0183 at original issue], it is allowed to install on any aeroplane an affected part, provided that, following installation, it is inspected and, depending on findings, corrected, as required by this AD.

GVI after Repair:

- (4) For any panel and/or retainer block of an affected part on which an intermediate repair has been accomplished in accordance with the instructions of the inspection SB, the next GVI as required by paragraph (1) of this AD can be deferred until 36 months after that repair. Thereafter, inspect that panel and/or retainer block at intervals not exceeding 6 months, as required by paragraph (1) of this AD.

New Requirements

Terminating Action:

- (5) Modification of an affected galley on an aeroplane, accomplished in accordance with the instructions of the modification SB, constitutes terminating action for the repetitive inspections as required by paragraphs (1) and (4) of this AD, as applicable, for that galley.
- (6) Modification of all affected galleys on an aeroplane, accomplished in accordance with the instructions of the modification SB, constitutes terminating action for the repetitive inspections as required by paragraphs (1) and (4) of this AD, as applicable, for that aeroplane, provided no affected parts are reinstalled on that aeroplane after that modification.
