BLA nr: 91-071 issue 2

Date : April 06, 1992

F O K K E R

Type: F.28 Mk.0100

Seq.: 083

Onder verwijzing naar BLA nr. 68-19-00 en BLA nr. 74-70-00 geeft de Directeur Luchtvaartinspectie van de Rijksluchtvaartdienst de volgende Bijzondere Luchtwaardigheidsaanwijzing.

Under authority of the Civil Air Navigation Regulations (RTL), the Director Aeronautical Inspection of the Civil Aviation Department issues the following Airworthiness Directive.

COMMUNICATIONS - PASSENGER ADDRESS SYSTEM - MODIFICATION

Description:

Tests have shown that an evacuation command, when given by the forward cabin attendant using the Passenger Address(PA)-system, may not be sufficiently audible for the aft cabin attendant. To correct this problem, Fokker has issued Service Bulletin (SB) F100-23-017, providing for the PA-system to be modified. Some necessary wiring changes were not included in the original SB, which made it impossible for this modification to be accomplished properly. To ensure adequate communications, this Airworthiness Directive requires the PA-system to be modified in accordance with the revised and corrected SB F100-23-017.

Effectivity:

F.28 Mk.0100 aircraft serial numbers:
11244 to 11339 inclusive

Effective date:

Compliance: required before August 01, 1992

Accomplishment: In accordance with Fokker Service Bulletin F100-23-017 revision 1 dated April 03, 1992 or a later RLD-approved revision.

Reason for revision: New SB and resulting change in "Compliance"

Remarks:

- In respect to art. 88 par 3 of the Civil Air Navigation Regulations, this Airworthiness Directive (BLA) must be accomplished by or under supervision of an approved company.
- All operators of the affected aircraft have received the ref. Service Bulletin directly from the manufacturer.
- This AD supersedes BLA 91-071 dated July 19, 1991.

Note: Address inquiries regarding this AD to:
