

EASA	NOTIFICATION OF A PROPOSAL TO ISSUE AN AIRWORTHINESS DIRECTIVE
	<p>PAD No.: 09-114</p> <p>Date: 28 September 2009</p> <p>Note: This Proposed Airworthiness Directive (PAD) is issued by EASA, acting in accordance with Regulation (EC) No 216/2008 on behalf of the European Community, its Member States and of the European third countries that participate in the activities of EASA under Article 66 of that Regulation.</p>
<p>In accordance with the EASA Continuing Airworthiness Procedures, the Executive Director is proposing the issuance/cancellation of an EASA Airworthiness Directive (AD), applicable to the aeronautical product(s) identified below. All interested persons may send their comments, referencing the PAD Number above, to the e-mail address specified in the 'Remarks' section, prior to the consultation closing date indicated.</p>

RB211-524 Series Engines, models RB211-524G2-T-19, RB211-524G3-T-19, RB211-524H2-T-19, all serial numbers, if Rolls-Royce RB211 Service Bulletin No. 72-D133 or Rolls-Royce RB211 Service Bulletin No. 72-E902 is incorporated.</p> <p>These engines are known to be installed on, but not limited to Boeing 747-400 series aircraft.</p> <p>2. RB211-524 Series Engines, models RB211-524H-T-36, all serial numbers, if Rolls-Royce RB211 Service Bulletin No. 72-D133 or Rolls-Royce RB211 Service Bulletin No. 72-E902 is incorporated.</p> <p>These engines are known to be installed on, but not limited to Boeing 767 series aircraft.</p> <p>3. RB211-535 Series Engines, models RB211-535E4-37, RB211-535E4-B-37, RB211-535E4-C-37, all serial numbers, if Rolls-Royce RB211 Service Bulletin No. 72-D133 or Rolls-Royce RB211 Service Bulletin No. 72-E902 is incorporated.</p> <p>These engines are known to be installed on, but not limited to Boeing 757 series aircraft.</p>

	<p>4. RB211-535 Series Engines, model RB211-535E4-B-75, all serial numbers, if Rolls-Royce RB211 Service Bulletin No. 72-D133 or Rolls-Royce RB211 Service Bulletin No. 72-E902 is incorporated.</p> <p>These engines are known to be installed on, but not limited to Tupolev Tu204 series aircraft.</p> <p>5. RB211-Trent 700 Series Engines, all models, all serial numbers, if Rolls-Royce RB211 Service Bulletin No. 72-D133 or Rolls-Royce RB211 Service Bulletin No. 72-E902 is incorporated.</p> <p>These engines are known to be installed on, but not limited to Airbus A330 series aircraft.</p> <p>6. RB211-Trent 800 Series Engines, all models, all serial numbers, if Rolls-Royce RB211 Service Bulletin No. 72-D133 or Rolls-Royce RB211 Service Bulletin No. 72-E902 is incorporated.</p> <p>These engines are known to be installed on, but not limited to Boeing 777 series aircraft.</p>
Reason:	<p>Cracking has been found on the inner wall between intermediate dilution chutes on a total of five front combustion liners of the standard corresponding to Rolls-Royce RB211 Service Bulletin No. 72-D133. The lives of two of these liners were confirmed to be below the currently valid borescope inspection interval.</p> <p>Ultimately, crack propagation could result in hot gas breakout with potential of downstream component distress and multiple turbine blade release beyond containment capabilities of the engine casings. Thus, cracking of this nature constitutes a potentially unsafe condition.</p> <p>Since Rolls-Royce Service Bulletin No. 72-E902 introduces further developments of Rolls-Royce RB211 Service Bulletin No. 72-D133, engines incorporating Rolls-Royce RB211 Service Bulletin No. 72-E902 are also considered to be potentially affected and are therefore included in the applicability of this AD.</p> <p>This AD requires a change to the initial and repeat borescope inspection intervals for the front combustion liner.</p>
Effective Date:	[TBD: 14 days after final AD issue date]
Required Action(s) and Compliance Time(s):	<p><u>A. Definition</u></p> <p>In the following LIFE will be referred as the lowest of the following lives:</p> <ul style="list-style-type: none"> -life of the combustion liner since new, -life of the combustion liner since inner wall replacement -life of the combustion liner since last combustion liner borescope inspection. <p><u>B.
