

**EASA**

## **PAD 11-086 WITHDRAWAL STATEMENT**

EASA has withdrawn the PAD 11-086 for the following reasons:

- EASA deemed necessary to include the ALI A310 document issue 8 maintenance requirements into a final AD along with the requirements from PAD 11-086.
- As AIRBUS, the approval holder of the A300, A300-600 and A310 family of aeroplanes published the ALI A310 document issue 8 just after the expiration date of consultation period for PAD 11-086, this exercise was impossible.
- Therefore EASA decide to incorporate all the old requirements specified into the PAD 11-086 as well as the new ones from ALI A310 document issue 8 into the new AD 2011- 0198, which is a final AD with request for comments.

Conclusion:

For the above mentioned reasons, PAD 11-086 is hereby withdrawn and replaced by the AD 2011-0198.
