Commenter 1: CAA Netherlands – Dirk-Jan de Lange – 30.05.2012

Comment # 1

Maybe the applicability should be extended with Hot-Air Airships?

EASA response:

Hot Air Balloon (HAB) components often are used in Hot Air Airships (HAA). In this particular case however, it is very unlikely that, due to the 'built in' nature of HAA fuel systems compared with HABs and the bespoke nature of the installation, one of the affected components could find its way onto a HAA without it being specifically supplied for the purpose by the Lindstrand Hot Air Balloons.
